1 Clinical Practice – New Consultations/Pre-Operative Management

Please assess, based on the records, and through your interview with the physician, whether the physician’s response in dealing with new or known patients who present with a new complaint or condition is appropriate. Pre-operative examination, testing and treatment should be evaluated.

### Clinical Practice – Management of Patients with Ongoing/Chronic Conditions

Please consider the evidence found in the records and, through your interview with the physician, the appropriateness of the physician’s actions in dealing with patients with chronic conditions. Conditions will usually require long-term monitoring.

### 3 CLINICAL PRACTICE - PSYCHOSOCIAL CARE

**INSTRUCTIONS**

Please consider the evidence found in the records and, through your interview with the physician, the appropriateness of the physician's actions in counselling their patients. This includes patient visits for general counselling, psychotherapy sessions, and patient support in reference to specific clinical situations. You should also consider the appropriateness of referrals to social services (e.g. public health nurse, home care, CCAC, Meals on Wheels), as well as to patient support groups and services that are available in the community (e.g. AA, Alzheimer's Society of Ontario).

Comments:
Patient Record Summary

On the following page, please record the patient charts reviewed. Each note should include a patient identifier, such as initials or chart number and date of birth, (please – no full names); the date of visit, the presenting problem and your comments. Include each chart, whether or not there are concerns or suggestions. If care is appropriate or exemplary, please ensure this is indicated in the “comments” section.

Between 15 and 25 charts should be reviewed. If this is not possible, please comment below:
